

(a) A shared class explanation

	Appearance a_c		Return $b_c = p_c / M$		Joint $a_c b_c$
Car	0.90 	×	0.90 	=	0.81 
Road	0.10 	×	0.10 	=	0.01 

Best joint support: $\max_c a_c b_c = 0.81$

Unknown score: $-\log(0.81) \approx 0.21$

(b) Conflicting class explanations

	Appearance a_c		Return $b_c = p_c / M$		Joint $a_c b_c$
Car	0.90 	×	0.10 	=	0.09 
Road	0.10 	×	0.90 	=	0.09 

Best joint support: $\max_c a_c b_c = 0.09$

Unknown score: $-\log(0.09) \approx 2.41$

Illustrative bounded supports; bars share a 0-1 scale.
